

News Release #7 – Saturday Afternoon Update

For release at 3:00 p.m.

November 30, 2019

Beaumont, Texas – Response measures are ongoing and Unified Command remains focused on mitigating the event and maintaining the safety of responders and the community. The fire at TPC's Port Neches Operations is contained and significantly reduced. Unified Command is thankful for the continued support of emergency responders and community.

As residents returned to their homes yesterday, questions arose regarding debris found in homes and on property. The event at Port Neches Operations on Wednesday resulted in pieces of process equipment being projected beyond the fence-line. Some of these pieces included asbestos insulation. Over the past 72 hours, CTEH has conducted air sampling surrounding the event site. Air sampling continues to verify no measurable concentrations of airborne asbestos fibers. Given the nature of asbestos, we have urged people not to try to attempt to clean up the debris themselves.

TPC Group has engaged CTEH, environmental response specialists, to conduct the assessments and lead removal efforts. Specialists will be assessing homes and yards within approximately one-half mile of the TPC Port Neches Operations fence-line. Please be aware that the clean up specialists are required to wear protective clothing (white Tyvek suits and respirators) to remove the asbestos debris. We expect assessments and clean up to begin immediately.

If you see debris in your yard, please call the Community Assistance Helpline at 866-601-5880 to file a claim.

Unified Command remains focused on protecting the safety of responders and the public and minimizing any impact to the environment.
